

Grasp obedience: requested vs. actually grasped position

Cell = grasps; green box = obeyed (diagonal); shade = row fraction. Left of each row: obeyed %, n.

Teleop - 0 placed (all three on table)

	grasped				
	left	mid	right	t.R	b.R
left 97% n=35	34	1			
middle 64% n=28	10	18			
right 24% n=29		19	7	3	
top right 88% n=16	2			14	
bottom right 53% n=19		1		8	10

rows: requested

Teleop+Auto - 0 placed (all three on table)

	grasped				
	left	mid	right	t.R	b.R
left 96% n=24	23		1		
middle 74% n=35	9	26			
right 32% n=38	3	21	12	2	
top right 94% n=32	1			30	1
bottom right 64% n=14		1		4	9

rows: requested

Teleop - 1 placed (two remaining)

	grasped				
	left	mid	right	t.R	b.R
middle 100% n=28		28			
right 55% n=38		16	21	1	
top right 91% n=11				10	1
bottom right 50% n=4			1	1	2

rows: requested

Teleop+Auto - 1 placed (two remaining)

	grasped				
	left	mid	right	t.R	b.R
middle 100% n=36		36			
right 71% n=31		8	22	1	
top right 100% n=4				4	
bottom right 50% n=4				2	2
